› TRAINING

We impart the requisite working knowledge and practical skills

FIRE RISK SURVEY

- › Critical fire safety analysis.
- › Fire investigations.

PRODUCT & SERVICE PORTFOLIO CONT...

FIRE ALARMS & SUPPRESSION SYSTEMS

FSS offers the latest technology in as far as fire alarm & suppression systems are concerned. Our systems have devices that detect and warn people through visual and audio appliances. Our different systems are designed to detect smoke, heat, carbon dioxide or other emergencies present and have the capacity to extinguish the hazard in the absence of humans. These alarm system maybe activated automatically from smoke detectors & heat detectors or may also be activated manually via manual call points.

Our strobes (Speakers) which sound an alarm , can be set to certain frequencies & different fones depending on the noise volumes of the areas & customer requirements & all this helps to ensure total evacuation incase of an emergency.

Our suppression system conform to latest environmental standards as we offer a choice of Stat-x, FM200, CO₂ systems. Our are easily maintained & come with the latest panels so you can rest assure your high value equipment is well protected.

AIR CONDITIONING

FSS has created a name in the climate control industry by being a supplier of top-quality temperature control devices. We are suppliers of top-quality brands i.e LG, Samsung, Rowa to mention but a few. It is our belief that our customers deserve only the best quality products.

With a dedicated staff, we believe in understanding our customer needs and meeting their requirements at the best prices thus ensuring we save our customer's resources. FSS serves both domestic and corporate clients hence our products meet the highest expected standards.

We supply and service air conditioning units for use in homes, offices, schools, hotels, canteens and kitchens. FSS offers both wall and ceiling options in accordance to customer requirements.

Our service and maintenance department, assures you quick turn around time for all spares, whilst ensuring that there is no compromise on quality. Our service department has back up spares for more than 100 line items for both commercial and domestic systems.

CCTV/ ACCESS CONTROL

We are a one stop shop in the Security industry and our CCTV department has integrated access control to ensure smarter home and office security. Our CCTV and Access control department not only ensures our customers a piece of mind but also ensure that they have total control of their businesses or homes even during their absence.

We supply intergrated CCTV, Access control as well as alarm security in accordance to customer requirements so ypu can keep your loved ones and property safe. Our systems are unique because they not only provide footage but they provide an alarm in the event of a breach hence enabling quick evacuation were necessary.

Our systems can be paired so as to help generate video data that is smart, and are able to offer facial recognition. Our smart systems are aimed at matching latest international standards hence ensuring that we stay ahead of latest intruder tack ticks.

FIRE SPRINKLERS

FSS has a dedicated engineering department that has more than 20 years working experience in the fire sprinkler system industry. Fire sprinkler systems are a form of active fire protection method, these systems can either be wet or dry, depending on the building usage. The sprinkler systems supply enough pressurized water, through a connected piping system thus ensuring that total protection for all the floor area.

Fire sprinkler systems are a cost effective and safe method for both domestic and commercial properties. FSS believes in providing relevance and value to customers thus we have a department that designs, installs, services and upgrades fire sprinkler systems, in line with modern building by-laws so that our customer's investment is kept safe even after hours.

Fire-Suppression Systems
